**Groton-** 2010 When Groton was first settled in 1655, clashes with Native Americans were frequent and brutal. When most buildings were burned during a March 1676 assault, Groton was abandoned for safer ground. With true determination, settlers returned two years later to rebuild their village. From that day forward, Groton continued to grow in population, industry, and community engagement. In 1869, resident

George S. Boutwell served as secretary of the treasury under Pres. Ulysses S. Grant and hosted a reception for the president when he visited Groton. During the town's industrial development in the last half of the 19th century, the Groton Leatherboard Company was established along the banks of the Squannacook River in West Groton. Lawrence Academy and Groton School have educated students since the 18th and 19th centuries, respectively. Continuing Groton's tradition of offering quality education, the Lowthorpe School was founded in 1901 as the

first landscape architecture school devoted to training only women. Despite all the changes that invariably altered the landscape and the infrastructure, Groton remains, in a sense, the same as it began: a town striving for self-sufficiency and success but also dedicated to shaping the world around it.

**Groton-L. Streeter** James L. Streeter 2009-11  
Groton - Historical Bits and Pieces is a compilation of many of the historical articles about Groton, Connecticut written by the author and published in the Groton Times newspaper over the past five years. Various subject matters, containing little known or interesting historical facts about Groton's people, places and things, are discussed in the articles. Many are accompanied by rarely viewed photographs which are part of the author's personal collection. Unusual and interesting subjects relating to Groton, including a three part series on police corruption during the years of prohibition, the presidential desk, old businesses,

hometown heroes, and many other unique stories appear in this book. Most of the articles cover the time frame between the late 1800's and the mid-1960's. Although many may not believe that the subjects are historical in nature, the author considers them to be "modern history" and in his words "one hundred years from now they will be valued as relevant history." This book will play an important role, both now and in the future, in the documentation of the history of Groton, Connecticut.

**Ledyard and Gales Ferry**-Kit Foster 2004  
Ledyard, Connecticut, is located along the east bank of the Thames River. The town was named for Colonel William Ledyard, who commanded Colonial forces in the Battle of Groton Heights in September 1781. The town's western village of Gales Ferry was the location of a fort established by Commodore Stephen Decatur during the War of 1812. The images in Ledyard and Gales Ferry provide a nostalgic glimpse of the shared history of these two communities. Included are special

events like the Harvard-Yale Regatta, the longest-running intercollegiate athletic event in the nation, and local icons such as the Great Oak, once the second-largest tree in Connecticut, under whose branches native tribes are said to have held their councils.

**Naval Submarine Base New London**-David J. Bishop 2005 The first U.S. naval submarine base traces its origin to 1868, when the state of Connecticut and the city of New London granted the navy one hundred twelve acres of land across the Thames River in Groton. Naval Submarine Base New London shows how this land developed from a depot for dry-docked ships and a coaling station for navy warships to its present designation as a submarine base. Nearly two hundred images depict the sailors and civilian workers who together maintained, serviced, and staffed the submarines, shops, and offices in support of the growing submarine fleet.

**A History of Mystic, Connecticut**-Leigh Fought 2007-12-07 Tucked away in a natural port, Mystic has long been home to seagoing adventure. In *A History of Mystic, Connecticut*, author and former Mystic Seaport librarian Leigh Fought relates the compelling story of this picturesque coastal community. Forged from the brutal Pequot War, for years Mystic was a quiet little farming village. Then came the War of 1812. Mystic's upstart venture capitalists seized on the war's dislocations to transform the settlement into a shipbuilding powerhouse. The shipyards launched vessels by the hundreds and an industry was born. The Civil War, steam-powered ships and the decline of commercial whaling halted Mystic's shipbuilding boom. Yet the town recovered, transforming itself into the charming nautical-themed tourist destination that has enchanted millions. Read Fought's comprehensive narrative to discover Mystic's role in New England's thrilling maritime saga.

**Pacifica**-Chris Hunter 2002 Predominantly built

as a "bedroom" community for the San Francisco Bay Area, Pacifica's rich and diverse heritage stretches back to the Spanish explorers of the 17th century. Captured here in over 200 vintage images is a tribute to this coastal community and the settlers and pioneers who made it what it is today. From the early 1900s story of the Ocean Shore Railroad to the recent battles over the California red-legged frog, Pacifica has often been shaped by outside forces. Like few other cities, it is primarily the result of a mixture of people and location; blue-collar families from the 1950s discovered Pacifica's oceanside charm, and helped create it. In the 21st century, the wealthy from the Peninsula and Silicon Valley are rediscovering the same charms, choosing Pacifica over the hustle and bustle of the rest of the Bay Area. This book of photographs, culled from the collection of the Pacifica Historical Society, the files of the Pacifica Tribune, and contributions of local residents, offers a glimpse of the history of one of California's "best kept secrets."

**Remembering Groton**-Carol W. Kimball 2008  
Famous for its submarine base and centuries of maritime lore, Groton also has been home to some of Connecticut's most historic and heroic personalities. In this collection, meet the patriotic "Mother" Bailey, who handed over her petticoat on the spot when a soldier approached her for war supplies in 1812, and John Bull, the Eskimo who traveled from the Arctic to testify on behalf of whaling captain John Spicer. From the self-proclaimed prophetess Jemima Wilkinson, who founded her own religious colony, to the millionaire Morton Plant, who built the Griswold Hotel, hailed as "the finest summer resort in America," Remembering Groton highlights the people and events that shaped this Thames River town into the vibrant and industrious community we know today.

never returned home to servicemen who never left--exist in the half square mile of Groton Bank. Ghostly soldiers of the Revolutionary War roam the Mother Bailey House and march through the basement of a nearby home, and former residents rouse sleepers at the Avery-Copp House. Fort Griswold was the site of a grisly 1781 battle, and phantom footsteps from an unknown entity echo on the first floor of the Ebenezer Avery House. Unseen inhabitants swing open doors at the Submarine Veterans Club, and long-dead guests add unexpected life to the parties at the Fleet Reserve. Join author Hali Keeler and her team as they navigate Groton Bank's paranormal history.

**Colver-Culver Family Genealogy**-Valerie Dyer Giorgi 1984 Edward Colver (1600/1610-1685) immigrated in 1635 from England to Boston, Massachusetts, and settled in 1636 in Dedham, Massachussts. He married Ann Ellis in 1638, moving later to Groton, Connecticut. Descendants (chiefly spelling the surname

Culver) and relatives lived in New England, New York, Pennsylvania, Iowa, California and elsewhere.

**Caledonia County**-Dolores E. Chamberlain 2015-03-16 Caledonia County, located in Vermont's "Northeast Kingdom," comprises 17 towns and villages. Early settlers cleared heavily forested land, and communities slowly took form. Businesses such as mills and factories emerged along the many rivers. Each town and village had many special attributes--Ricker's sawmill in Groton cut timbers until 1965, Peacham provided granite for monuments across the country, and St. Johnsbury manufactured goods like scales and maple syrup. Hardworking and industrious, residents have endured fires, floods, extremely harsh winters, and droughts, and they continue to boast a resilient spirit today.

**Captive**-P. Gifford Longley 2011 He smelled again the musty stench. He gagged. He reckoned

it to be the odor of blood, The rotting scalps that were tied To The Indian's belt—recent victims. In his dread, he made no sound. Captive is the true story of a family torn apart by the hate, racism, and greed that consumed brutal colonial New England. Twelve-year-old John's parents and siblings are massacred by the Abenaki Indians, and he is abducted. Irrevocably separated from his loved ones, John must find a way to survive among his violent captors, using skill and wit to adapt. A full year after the horrific massacre of Groton, Jack continues to mourn the death of his brother's family and search for a way, any way, To find his nephew John. But in all that time there has not been a single lead about the missing children of Groton. Desperate and heartsick, Jack gambles on Hector, a Native American trader. The wily Indian swears to deliver John, but for an obscene amount of money. Even if the Abenaki are approached and John located, will Hector deliver the Captive? 'Captive is not 'dumbed down' history...I had goose bumps, anxiously wondering what would happen next!' —Kara Fossey, Groton Historical

Society the companion volume, Compelled, completes the story of Captive.

**Electric Boat Corporation**—James S. Reyburn  
2006 Electric Boat Corporation has been a world leader in submarine development, design, and construction for more than a century. In 1900, the company delivered the Holland, the first submarine accepted by the United States Navy. Fifty-five years later, it turned fantasy into fact by sending the world's first nuclear-powered ship, the submarine Nautilus, off on its maiden voyage. It later built the world's first ballistic missile-firing submarine, the George Washington, and most of the nation's current undersea fleet. Between those years, it pioneered standardized construction of merchant ships, submarine chasers, torpedo boats, and yachts and also produced airplanes, fishing trawlers, diesel engines, and electric motors. This collection of more than 200 archival photographs traces the company's sometimes roller-coaster existence through 10 historic

decades when America—and Electric Boat Corporation—grew into an industrial giant. It is an engaging collective portrait of American ingenuity, know-how, and persistence driving technology to new heights. **Little Pink House**-Jeff Benedict 2009-01-26  
SOON TO BE A MOTION PICTURE STARRING CATHERINE KEENER "Catherine Keener nails the combination of anger, grace, and attitude that made Susette Kelo a nationally known crusader." -- Deadline Hollywood Suzette Kelo was just trying to rebuild her life when she purchased a falling down Victorian house perched on the waterfront in New London, CT. The house wasn't particularly fancy, but with lots of hard work Suzette was able to turn it into a home that was important to her, a home that represented her new found independence. Little did she know that the City of New London, desperate to revive its flailing economy, wanted to raze her house and the others like it that sat along the waterfront in order to win a lucrative

Pfizer pharmaceutical contract that would bring new business into the city. Kelo and fourteen neighbors flat out refused to sell, so the city decided to exercise its power of eminent domain to condemn their homes, launching one of the most extraordinary legal cases of our time, a case that ultimately reached the United States Supreme Court. In *Little Pink House*, award-winning investigative journalist Jeff Benedict takes us behind the scenes of this case -- indeed, Suzette Kelo speaks for the first time about all the details of this inspirational true story as one woman led the charge to take on corporate America to save her home. Praise for the book: "Passionate...a page-turner with conscience." -- Publishers Weekly

**Hamden**- 2004 Hamden is nicknamed "the Land of the Sleeping Giant" after the series of hills within its bounds that resemble a recumbent giant. But Hamden is much more than the resting place of the legendary "Hobbomock." The town's history is illustrated here in Hamden, which

contains photographs dating from the 1840s through the late 1900s. These vintage images depict the contours of community life in Hamden. The collection highlights famous residents, including Eli Whitney and Thornton Wilder; local eccentrics, including the wandering Leatherman and William Beamish, a female printer who lived as a man; changes in the land from forest to farmland to suburbia; businesses, institutions, civic organizations, and churches; and people at play--from skaters on Lake Whitney to hikers on the Sleeping Giant.

**Brain Snacks for Teens on the Go! Second Edition**-Alex Southmayd 2011 "Brain Snacks are effective ideas and strategies to help teens turbo-charge their lives. They're delicious and nutritious 'snacks' of information that can help teens become happier, healthier, and more successful in their lives and, ultimately, make the world a better place"--P. [4] of cover.

**Mystic**-Kent Fuller, Meredith Fuller, Lisa Saunders 2016 Since Mystic, Connecticut, celebrated its 300th anniversary in 1954, it has evolved from a working-class village into a tourist-driven community while embracing its quaint New England charm and keeping its rich history alive. The shoreline village of two townships (Stonington to the east; Groton to the west) is divided by the Mystic River, which passes through the downtown center where the iconic bascule bridge unites the community. Many establishments occupy buildings preserved from Mystic's deeply anchored shipbuilding past. Towering wooden ships, beluga whales, creative arts, shops, restaurants, and events overflowing with Mystic's heart and soul attract hundreds of thousands of visitors each year.

**A Boy Named FDR**-Kathleen Krull 2016 Focuses on Franklin Delano Roosevelt's childhood and summarizes his achievements as president.

**Connecticut Coast**-Diana Ross McCain 2009-04-01 Connecticut Coast is a richly illustrated history of the Nutmeg State's storied shoreline, from New York State to Rhode Island. Researched and written by a longtime expert in Connecticut history, it comprises a brief narrative on each of the twenty-four shoreline communities, accompanied by the area's best historic photography. Sidebars sprinkled throughout present lighthouses, fishing and shellfishing, transportation, storms, and more—from the legendary Savin Rock Amusement Park to stylish Jackie Kennedy christening the USS Lafayette in Groton.

**From Alpha to Omega**-Anne H. Groton 2013-04-17 One of the most successful Classical Greek introductory textbooks, this edition provides an introduction to Classical Greek with an encouraging, pleasant, and accessible presentation for today's modern students. Fifty short lessons presume no knowledge of Latin, and allow students to master a concept before

moving on to the next. Each lesson is accompanied by numerous exercises, as well as manageable selections of Ancient Greek writings (edited in early chapters) from Aesop's most amusing and curious fables to concise Greek passages from The New Testament, Aristotle, Arrian, Demosthenes, Lysias, Plato, Thucydides, and Xenophon. The fourth edition of From Alpha to Omega retains all the features that have made it a best-selling introductory Greek textbook, many of them improved or expanded: Balanced, evenly-paced lessons to accommodate various academic schedules Brief readings from Ancient Greek authors Efficient translation exercises Succinct, instructive vocabulary lists Glossary containing all vocabulary words from lessons and readings, both Greek-to-English, and English-to-Greek Online exercises, audio recordings, video tutorials, and more accompany each chapter at courses.pullins.com. An Ancillary Exercise Workbook and a Greek Reader are also available.

**Forest Hills**-Nicholas Hirshon 2013 Presents a

pictorial history of Forest Hills, New York showing the growth of the community.

**Inside Money**-Zachary Karabell 2021 "From an acclaimed historian and financial analyst, the first definitive history of the legendary private investment firm Brown Brothers Harriman - and through it, the rise to world power of the so-called American Establishment. Conspiracy theories have always swirled around Brown Brothers Harriman, and not without reason. Throughout the 19th century, when America was convulsed by a devastating financial panic every generation, Brown Brothers quietly went from strength to strength, propping up the US financial system at crucial moments and catalyzing successive booms, from the cotton trade and the steam ship to the railroad, while avoiding unwelcome attention. By the turn of the 20th century, Brown Brothers was at the heart of what was meant by the American Establishment. As America's reach extended beyond its shores, Brown Brothers was there, often working hand in

glove with the State Department, as in Nicaragua in the 1910's, when the firm was essentially empowered to take over the country's economy. To the Browns, virtuousness was a given; in that spirit they supported the elite institutions that forged successive generations of leaders. When, during the Great Depression, Brown Brothers ensured their strength by merging with Averell Harriman's investment bank to form Brown Brothers Harriman, the die was cast for the role the firm would play on the world stage during World War 2 and thereafter. Its core leadership cadre, including Harriman, Robert Lovett, and Prescott Bush, all Skull and Bones men from Yale, played a central role in erecting the architecture of the postwar order, with the US dollar at its heart. In *Inside Money*, Zachary Karabell offers the first full and frank look inside this very private institution as a prime mover in the larger American story. Blessed with complete access to the company's archives and a thrillingly strong grasp of the bigger picture, Karabell has written in effect an x-ray film of American power from 1818 to the present"--

**Groton**-Carol W. Kimball 2004 Boats and the sea have always been an important part of the history of Groton, known as the submarine capital of the world. It is home to a U.S. submarine base and to General Dynamics-Electric Boat. Electric Boat's prolific submarine construction in the 1940s helped America win World War II, and it was in Groton that the world's first nuclear-powered submarine, the USS Nautilus, was built and launched. The village of Mystic, now a popular tourist destination, was home to the nineteenth-century shipyards that built the Andrew Jackson, the clipper ship that made the record-setting voyage between New York and San Francisco, and the Galena, the first oceangoing ironclad used by the Union navy during the Civil War.

captured the British merchantman the Hanna, loaded with a bounty of luxury goods destined for British officers based in New York City. That action induced the British supreme leader of British forces in America to grant permission to the infamous traitor Benedict Arnold to lead an 1,800-man punitive amphibious expedition to destroy the American privateer base in New London. Being a native of the region, Arnold—a former American general—had intimate knowledge of the port and its defenses, including the most powerful fortification defending the harbor from Groton Heights Fort Griswold. So important was the fort that Arnold dedicated half of his expeditionary force to landing on the east side of the Thames River, for the sole purpose of capturing the fort and putting its heavy cannon out of commission. But Arnold miscalculated and misapprehended the strength of the fort and its defenders. That misperception would have grievous consequences for the fort's British attackers and their outnumbered American defenders. The defenders numbered around 161, made up of some forty members of the regular

garrison and some volunteers from the privateers' crews, including a member of the Pequot tribe. The bulk of the defenders were citizen volunteers from Groton and nearby towns. Virtually all males of local families, aged anywhere from twelve to seventy, defended the fort. In the end, the attackers suffered close to two hundred casualties. The patriots faced catastrophic losses amounting more than 80 percent with half the defenders slain outright. This is a story of that long forgotten stubborn defense by American patriots and the unusual and unforeseen circumstances that turned the assault into a bloodbath—the most sanguinary battle ever witnessed on the soil of Connecticut.

**Book of Glock**-Robert A. Sadowski 2018-03-13  
While movies and television have made many people familiar with the name Glock, not many know the history of Glock's pistols. With *The Book of Glock*, Robert A. Sadowski showcases all of Glock's American handgun models, from the first model, the Glock 17, which premiered in

1982, to the all-new G43, and educates firearms enthusiasts on the quirks of each. The Book of Glock references all Glock pistols available in the United States with in-depth information on all models—history, serial numbers, rare Glock variants, comparative models, cutaway sales models, and more. Sadowski worked closely with Stanley Ruselowski, the president of the Glock Collectors Association, to bring readers information and photos of rarely seen Glocks. Each chapter is dedicated to a different model. Sadowski provides a timeline of the company's evolution and a close look at how Glock redefined the combat pistol. Other chapters touch on rare models, commemorative editions, and Glock tools and accessories. Whether a firearms collector or a new enthusiast, anyone can enjoy Sadowski's analysis of Glocks throughout history.

**New England's Ancient Mysteries**-Robert Cahill 1993 "Called the ""Reader's Digest of New England Archaeology,"" by experts in the field, this book covers all finds and sites by amateur and

professional ancient artifact hunters since America was first settled. Hundreds of messages were cut into stone by unknown ancient settlers. Carved faces, well-made homes of rock, Celtic ritual sites, dolmens, and other ancient remnants are scattered throughout the New England states, making it quite apparent that visitors from other lands lived here hundreds of years before Columbus discovered America. Ancient coins, weapons, lamps, containers and art objects have been uncovered as well -- all well documented and described, with photos in this fascinating book."

**Groton**-Rosemarie Palmer Tucker 2009 The town of Groton officially came into being in 1818, after citizens successfully petitioned to change their town's name. Later during the 19th century, this industrial community was famous for the manufacturing of road rollers, iron bridges, and carriages. The early 1900s brought typewriter manufacturing to Groton. Included in the town of Groton are the hamlets of Groton City, McLean,

Peruville, and West Groton. Throughout the early years, these hamlets were booming with businesses and industry, and both town and village display a rich architectural legacy. Groton had many well-known residents, such as the Conger family, including Benn Conger, a member of the New York State Assembly and the New York State Senate; Dexter Marsh, cofounder of the First National Bank of Groton; Welthea Marsh, the first and only woman president of the bank; and inventor Nelson Streeter.

**Groton Plantation**-James B. Stoltman  
1974-01-01

**The Wise Men**-Walter Isaacson 1997-06-04 A captivating blend of personal biography and public drama, *The Wise Men* introduces the original best and brightest, leaders whose outsized personalities and actions brought order to postwar chaos: Averell Harriman, the freewheeling diplomat and Roosevelt's special

envoy to Churchill and Stalin; Dean Acheson, the secretary of state who was more responsible for the Truman Doctrine than Truman and for the Marshall Plan than General Marshall; George Kennan, self-cast outsider and intellectual darling of the Washington elite; Robert Lovett, assistant secretary of war, undersecretary of state, and secretary of defense throughout the formative years of the Cold War; John McCloy, one of the nation's most influential private citizens; and Charles Bohlen, adroit diplomat and ambassador to the Soviet Union.

**America's Great Game**-Hugh Wilford  
2013-12-03 From the 9/11 attacks to waterboarding to drone strikes, relations between the United States and the Middle East seem caught in a downward spiral. And all too often, the Central Intelligence Agency has made the situation worse. But this crisis was not a historical inevitability—far from it. Indeed, the earliest generation of CIA operatives was actually the region's staunchest western ally. In

America's Great Game, celebrated intelligence historian Hugh Wilford reveals the surprising history of the CIA's pro-Arab operations in the 1940s and 50s by tracing the work of the agency's three most influential—and colorful—officers in the Middle East. Kermit “Kim” Roosevelt was the grandson of Theodore Roosevelt and the first head of CIA covert action in the region; his cousin, Archie Roosevelt, was a Middle East scholar and chief of the Beirut station. The two Roosevelts joined combined forces with Miles Copeland, a maverick covert operations specialist who had joined the American intelligence establishment during World War II. With their deep knowledge of Middle Eastern affairs, the three men were heirs to an American missionary tradition that engaged Arabs and Muslims with respect and empathy. Yet they were also fascinated by imperial intrigue, and were eager to play a modern rematch of the “Great Game,” the nineteenth-century struggle between Britain and Russia for control over central Asia. Despite their good intentions, these “Arabists” propped up

authoritarian regimes, attempted secretly to sway public opinion in America against support for the new state of Israel, and staged coups that irrevocably destabilized the nations with which they empathized. Their efforts, and ultimate failure, would shape the course of U.S.-Middle Eastern relations for decades to come. Based on a vast array of declassified government records, private papers, and personal interviews, America's Great Game tells the riveting story of the merry band of CIA officers whose spy games forever changed U.S. foreign policy.

**The Old American**-Ernest Hebert 2012-05-18 A long-awaited new novel set in the period of the French and Indian Wars brings a new dimension to the region's history

**Groton-Mystic Emergency Services**-James L. Streeter and William J. Tischer 2016-11-14 Established in 1705, the town of Groton is geographically located between the Thames and

Mystic Rivers in the southeastern corner of Connecticut. The town is comprised of eight separate subdivision communities that are referred to as fire districts. Groton is also the home to a large naval submarine base, a small general aviation airport, and several major industrial facilities, including the Electric Boat Corporation and Pfizer, Inc. The Mystic fire district is recognized for its historical maritime museums and facilities and plays host to thousands of tourists each year. At the present time, Groton and Mystic are provided emergency services by 13 fire departments, three police departments, two ambulance associations, one paramedic response unit, and one central dispatch operation.

**The Colored Patriots of the American Revolution**-William Cooper Nell 1855

**A Libertarian Walks Into a Bear**-Matthew Hongoltz-Hetling 2020-09-15 A tiny American

town's plans for radical self-government overlooked one hairy detail: no one told the bears. Once upon a time, a group of libertarians got together and hatched the Free Town Project, a plan to take over an American town and completely eliminate its government. In 2004, they set their sights on Grafton, NH, a barely populated settlement with one paved road. When they descended on Grafton, public funding for pretty much everything shrank: the fire department, the library, the schoolhouse. State and federal laws became meek suggestions, scarcely heard in the town's thick wilderness. The anything-goes atmosphere soon caught the attention of Grafton's neighbors: the bears. Freedom-loving citizens ignored hunting laws and regulations on food disposal. They built a tent city in an effort to get off the grid. The bears smelled food and opportunity. A Libertarian Walks Into a Bear is the sometimes funny, sometimes terrifying tale of what happens when a government disappears into the woods. Complete with gunplay, adventure, and backstabbing politicians, this is the ultimate

story of a quintessential American experiment -- to live free or die, perhaps from a bear.

**Surgeon of the Old Sixth**-M. P. McConnell  
2015-10-20 After the fall of Fort Sumter to Confederate forces in April 1861, Dr. Norman Smith predicted "that means war and I will go tomorrow morning if called upon." And so he did, two days later, as surgeon of the Massachusetts "Old Sixth" Regiment when it answered Lincoln's first call for troops. Best known for its fight through Baltimore, when it was attacked by a secessionist mob and met with the first deaths of the Civil War, this historic regiment provided the primary defense of Washington, D.C. while it was under siege. Regarded as the "life of the regiment," Smith headed to war leaving his new bride, having previously lost four wives and all four of his children. This is a story of the resiliency of a deeply patriotic and spiritual man whose career spanned profound changes in medicine and who grappled with the wartime illness that would eventually kill him. It is also

the story of a regiment whose march to save the capital captivated a country in the early days of the war, inspiring poems, songs, and artists. Its story has since been largely overlooked but it earned its place in history as the "first to volunteer," "first to give their lives," and "first to reach Washington equipped and ready to defend the capital." This account vividly exposes the chaos of the first days of the Civil War when the stakes were so high including new details about the "Old Sixth" Regiment's camp conditions, health problems, number of Baltimore casualties, and discipline challenges at the end of its service. The medical practice of a 19th century New England doctor comes alive along with details of the first amputation of the Civil War by Dr. Smith steps away from the Capitol Rotunda in the then chambers of the U.S. Supreme Court. Richly illustrated with the first-ever gathering of period artwork and photographs chronicling the "Old Sixth's" service, along with extensive research into archival collections with never before published details from letters, diaries, and orderly books--this work will appeal to the

serious historian and non-historian alike!

### **What Stress Can Do**-Harry L. Campbell

2014-04 Whether it's your daily dealings at work or a pervasive concern for your physical safety, the stress you regularly experience may actually be more harmful than the threat that triggered it. Not only can it lead to isolation and an erosion of happiness, stress can be biologically harmful, bringing about health issues, such as heart disease, high blood pressure, ulcers, and strokes. In short, successfully managing stress could be nothing less than a life-or-death situation. Now, professional biofeedback practitioner Harry L. Campbell presents "What Stress Can Do," his unprecedented guide to the importance of minimizing everyday stress in order to short-circuit its many serious side effects. What's more, his easy-to-implement recommendations enable you to do so without use of any drugs. Recent data on the prevalence of stress documents that as much as 90 percent of all doctors' office visits are related to stress. However, with the right

skills and perspective, you can preempt the physical fallout from the tolls of daily life, and gain new mastery over your mind. The time is right to take a step back, breathe easy, and once and for all address all that ails you.

### **Morton F. Plant and the Connecticut**

**Shoreline**-Gail B. MacDonald 2017-08-07 Gilded Age financier Morton F. Plant inherited his father's transportation empire determined to improve his community. A dreamer eager to invest in innovative technology and grass-roots community causes alike, Plant's influence ran deep on the Connecticut shoreline prior to World War I, and his legacy remains prominent. Plant's summer mansion, Branford House, is one of southeastern Connecticut's iconic landmarks. He was instrumental in founding the prestigious Connecticut College. And the Shennecossett Golf Club he developed as part of his summer resort is a popular public course. Gail Braccidiferro MacDonald brings to life this important figure in Connecticut history and demonstrates his long-

reaching impact.

**American Wife**-Curtis Sittenfeld 2008-09-02 On what might become one of the most significant days in her husband's presidency, Alice Blackwell considers the strange and unlikely path that has led her to the White House—and the repercussions of a life lived, as she puts it, “almost in opposition to itself.” A kind, bookish only child born in the 1940s, Alice learned the virtues of politeness early on from her stolid parents and small Wisconsin hometown. But a tragic accident when she was seventeen shattered her identity and made her understand the fragility of life and the tenuousness of luck. So more than a decade later, when she met boisterous, charismatic Charlie Blackwell, she hardly gave him a second look: She was serious and thoughtful, and he would rather crack a joke than offer a real insight; he was the wealthy son of a bastion family of the Republican party, and she was a school librarian and registered Democrat. Comfortable in her quiet and

unassuming life, she felt inured to his charms. And then, much to her surprise, Alice fell for Charlie. As Alice learns to make her way amid the clannish energy and smug confidence of the Blackwell family, navigating the strange rituals of their country club and summer estate, she remains uneasy with her newfound good fortune. And when Charlie eventually becomes President, Alice is thrust into a position she did not seek—one of power and influence, privilege and responsibility. As Charlie's tumultuous and controversial second term in the White House wears on, Alice must face contradictions years in the making: How can she both love and fundamentally disagree with her husband? How complicit has she been in the trajectory of her own life? What should she do when her private beliefs run against her public persona? In *Alice Blackwell*, New York Times bestselling author Curtis Sittenfeld has created her most dynamic and complex heroine yet. *American Wife* is a gorgeously written novel that weaves class, wealth, race, and the exigencies of fate into a brilliant tapestry—a novel in which the

unexpected becomes inevitable, and the pleasures and pain of intimacy and love are laid bare. BONUS: This edition includes an excerpt from Curtis Sittenfeld's *Sisterland*. Praise for *American Wife* "Curtis Sittenfeld is an amazing writer, and *American Wife* is a brave and moving novel about the intersection of private and public life in America. Ambitious and humble at the same time, Sittenfeld refuses to trivialize or simplify people, whether real or imagined." –Richard Russo "What a remarkable (and brave) thing: a compassionate, illuminating, and beautifully rendered portrait of a fictional Republican first lady with a life and husband very much like our actual Republican first lady's. Curtis Sittenfeld has written a novel as impressive as it is improbable." –Kurt Andersen

**Cortland**-Mary Ann Kane 2010 When Cortland was incorporated as a village in 1853, its population was mainly transplanted New Englanders and Irish immigrants, and it encompassed territory 1 mile from east to west.

By 1871, two rail lines crossed the village, and their cargos of coal encouraged the development of industries, particularly carriages and sleighs. The 1890s brought Cortland's first urban renewal with industrialists replacing wooden mansions with ones of brick, stone, and Queen Anne designs. The 20th century opened with full employment in industries that not only served the country but also the world. This encouraged Italians, Ukrainians, and Lebanese to settle in Cortland and share their heritage. Photographs from the archives of the Cortland County Historical Society illustrate how life was lived in Cortland before the 21st century.

**The Kingdom of Golf in America**-Richard J. Moss 2020-03-09 For golf's true enthusiasts, the game is far more--and far more complex--than a simple hobby, commodity, or slice of the sports industry. It is a physical and mental place to be, a community. It has a history, a hierarchy, laws, a language, and a literature. And in Richard J. Moss, it has a chronicler. From its beginnings in the northeastern United States in the 1880s, golf has seen its popularity, and its fortunes, wax and wane, affected by politics and economics, reflecting tensions between aristocratic and democratic impulses. The Kingdom of Golf in

America traces these ups and downs, ins and outs, in the growth of golf as a community. Moss describes the development of the private club and public course and the impact of wealth and the consumer culture on those who play golf and those who watch. He shows that factors like race, gender, technology, suburbanization, and the transformation of the South that shaped the nation also shaped golf. The result is a unique, and uniquely entertaining, work of cultural history that shows us golf as a community whose story resonates far beyond the confines of the course. Purchase the audio edition.
